

Award-winning Dexterra Concert™ Mobile Business Platform Achieves “Powered by SAP NetWeaver®” Status

Bothell, WA – May 1, 2007 – Dexterra, Inc., the fastest-growing mobile solutions company worldwide, today announced its Dexterra Concert 4.9 platform has achieved “Powered by SAP NetWeaver®” status. With its certified integration and flexible service-oriented architecture, customers can now leverage Dexterra Concert in conjunction with their SAP® solutions to rapidly mobilize their enterprise applications, evolve them to support unique business processes, and ensure their mobile workforce stays connected to critical information within key enterprise systems.

“Our clients want to maximize their existing investments in IT, but at the same time, require new types of business solutions that extend functionality into new areas. Redesigning field processes for greater operational efficiency and effectiveness, as opposed to just extending desktop applications to the field, is a key area for many of them,” said Andy Mulholland, global chief technology officer for CapGemini. They also want low integration costs, the ability to have agility in the solution and - above all – reliability. Vendor-certified solutions, such as Dexterra Concert which has now achieved Powered by NetWeaver status, allow CapGemini to achieve these goals.

To achieve Powered by SAP NetWeaver qualification, Dexterra has demonstrated that Dexterra Concert 4.9 can be successfully deployed on a J2EE-based deployment of the SAP NetWeaver Application Server Release 6.40 and is accessible via the SAP NetWeaver Portal. This deployment has been tested and certified by the SAP Integration and Certification Center.

“Powered by SAP NetWeaver status gives customers using SAP solutions even more piece of mind when they choose Dexterra to help implement their enterprise-wide mobility strategy,” said Howard Beader, vice president of marketing for Dexterra. “By leveraging Dexterra Concert, now integrated with SAP NetWeaver, customers can achieve the benefits of adopting The Mobile Way of Business™.”

Dexterra continues to seize market momentum, as companies are increasingly turning to Dexterra to mobilize their enterprise systems, while the top IT research firms are positioning the company as a leader within the mobile enterprise software market:

- The company recently won one of the largest mobile software contracts in history and will be announcing the details in the near future
- The company was recently awarded a contract to mobilize the largest Remedy installation in the world
- Three of the four largest telecommunications companies worldwide have selected Dexterra to enable their own organizations
- Dexterra has won the majority of deals among the largest Life Sciences companies in the last year
- IDC ranked the company in the Leadership Grid in its annual “Worldwide Mobile Middleware Forecast and Market Share” report for 2007
- Dexterra was positioned by Gartner in the Visionaries quadrant of its most recent Magic Quadrant for Multichannel Access Gateways report in late 2006

The SAP NetWeaver platform powers the SAP Business Suite family of applications, SAP xApps™ packaged composite applications, and solutions such as Dexterra Concert. SAP NetWeaver unifies integration technologies into a single platform and is pre-integrated with business applications, enabling change and reducing the need for custom integration.

###

About Dexterra

Dexterra is the fastest-growing mobile solutions company in the world. Dexterra Concert™ - the company's flagship product – enables organizations to assemble, adapt and evolve mobile composite applications using industry standard-based toolsets for both Windows and Java environments. Supporting field service, field sales, asset management, workforce management, and several other mobile business functions, Dexterra's full suite of industry-specific solutions easily adapt to business process changes, support the largest selection of wireless and mobile devices, and integrate with the greatest number of enterprise back-office systems – all without disrupting companies' existing enterprise IT environments.

Many of the world's premier mobile technology companies and industry leaders rely on Dexterra to power their Mobile Way of Business, including Emirates Airlines, IKON Office Solutions, Motorola, Stanford University and the United States Department of Homeland Security. With offices in Seattle, Toronto, London, Cologne, Dubai, Singapore, and Melbourne, Dexterra also partners with technology leaders such as IBM, Microsoft, Accenture, RIM, CapGemini, Telstra, @Road, and Cingular.
