

Dexterra Named in Top-Ten of Deloitte's Technology Fast 50

Company's Mobility Platform and Mobile Business Applications Enable Businesses to Reduce Operational Costs, Increase Mobile Worker Productivity and Improve Management Visibility

Bothell, WA — September 29, 2008 — Dexterra, Inc., a leading provider of software to automate and manage mobile workforces, has been named to Deloitte's prestigious Technology Fast 50 program for Washington State, a ranking of the 50 fastest growing technology, media, telecommunications, and life sciences companies in the area by Deloitte, one of the nation's leading professional services organizations. Rankings are based on the percentage revenue growth over five years from 2003–2007.

"Sustaining high revenue growth over five years is an exceptional accomplishment," said Larry Hile, Managing Partner in Deloitte's Technology, Media & Telecommunications (TMT) and Health & Life Sciences Washington State practice. "We commend Dexterra for making the commitment to technology and delivering on the promise of market longevity. We are proud to honor Dexterra to Deloitte's Technology Fast 50."

Dexterra's CEO Michael Liebow credits Dexterra's success to its industry-leading mobile business platform and applications that automate and manage business processes for the mobile worker, and strong relationships with many of the world's largest wireless carriers, which have driven the company's double digit percent revenue growth from 2003–2007. Liebow said, "With proven customer deployments and advanced mobile business solutions to help companies mobilize their business processes, we are honored to be ranked in the Deloitte Technology Fast 50. Dexterra's continued growth is a tribute to the hard work of our employees and the commitment of our customers and partners."

Dexterra's increase in revenues from 2003 to 2007 resulted in a 10th ranking in the Technology Fast 50 for Washington State. The average increase in revenues among companies who made the Technology Fast 50 for this region was 1355.37 percent.

To qualify for the Technology Fast 50, companies must have had operating revenues of at least \$50,000 in 2003 and \$5,000,000 in 2007, be headquartered in North America, and be a company that owns proprietary technology or proprietary intellectual property that contributes to a significant portion of the company's operating revenues; or devotes a significant proportion of revenues to the research and development of technology. Using other companies' technology or intellectual property in a unique way does not qualify.

Companies from the regional Technology Fast 50 programs in the United States and Canada are automatically entered in Deloitte's Technology Fast 500 program, which ranks North America's top 500 fastest growing technology, media, telecommunications and life sciences companies.
